

International Managed Bandwidth Services

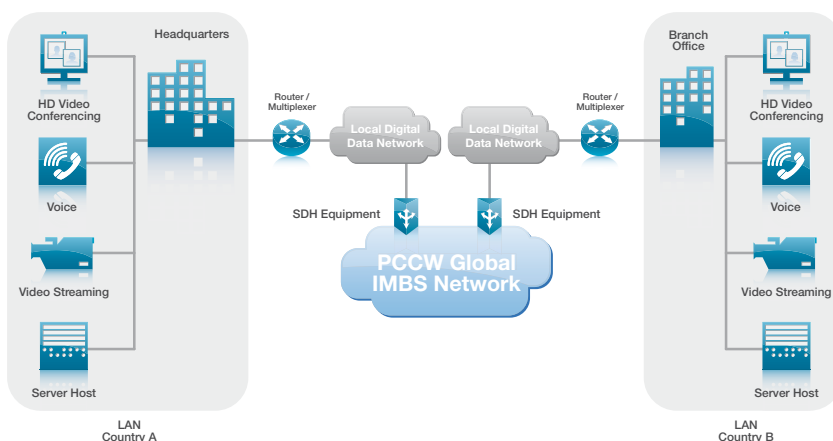

Stay connected with the rest of the world at all times, with PCCW Global's International Managed Bandwidth Services (IMBS).

IMBS is an end-to-end managed bandwidth service that provides customers with dedicated pure Layer-1 international data bandwidth for various types of real-time and mission-critical applications including data, voice and video.

Key benefits to your business

- Cross-border connections for every network topology and bandwidth need
- Exclusive dedicated end-to-end links to prevent hacker attacks
- Protocol transparency with minimal transmission delay, supporting the most demanding client-server applications
- Wide selection of bandwidth and interface options for seamless integration
- International Ethernet Private Line Service (IEPL) (enhanced IMBS) offers flexible bandwidth subscription and speedy circuit upgrade in selected countries
- Extensive global coverage in over 150 countries around the world

Network diagram

Specifications

- Dedicated end-to-end managed bandwidth service
- Data rates supported:
 - 64 Kbps up to 2.5 Gbps (STM16) and above
 - 10 Mbps up to 1,000 Mbps with IEPL
- Protected and unprotected services
- Standard interface:
 - V.35, X.21, G.703
 - Ethernet, Fast Ethernet and Gigabit Ethernet for IEPL

Features and value-added services

- 100% service level commitment to major destinations around the world
- Network resilience and diversity
- 24/7 global network operations centers in the US, Australia and Hong Kong
- One-stop shop services
- Managed Router Service (optional)
- Project management (optional)

Why PCCW Global

Resilient global infrastructure & robust network

- Global network and infrastructure covering more than 150 countries

Service excellence

- Global Services team to manage implementation of regional and global projects
- World-class provisioning and operating processes
- Toll-free services with multilingual support

Innovative solutions based on leading-edge technology

- Integrated global communications solutions with on-demand bandwidth flexibility over IEPL
