

BROADBAND VSAT SERVICE

ENTERPRISE SOLUTIONS

INTRODUCING BROADBAND VSAT PCCW

Global's IP-enabled communication services aim at providing users in Asia and Middle East with regional and global public Internet and private networking services, including broadband Internet access, voice-over-IP (VoIP), and managed data services.

Our Broadband VSAT Services combines the best of satellite and terrestrial communications technologies, providing reliable, cost effective IP-based solutions. This service provides a very cost effective two-way IP based satellite solution for enterprise customers in far to reach areas.
