

IP TRANSIT

A Reliable Connection to Domains Worldwide

SERVICE PROVIDER SOLUTIONS

...more **SPEED**

...better **RELIABILITY**
and **SUPPORT**

...and more **REVENUE**

INTRODUCING IP TRANSIT With the added security of a global MPLS backbone, PCCW Global offers carrier-grade service and support. We have extensive public and private peering arrangements with NAPs worldwide to connect global carriers, ISPs and content providers.

PCCW Global can help you keep up with the ever-increasing demands of your customers for Internet services and Web content with reliable connections to domains worldwide. Our IP Transit service is fully optimized using MPLS traffic engineering techniques to maximize network performance.

KEY BENEFITS TO YOUR BUSINESS

Get more out of your network, be more competitive and maximize revenues with tailored IP Transit solutions from PCCW Global:

MPLS backbone traffic engineering ensures optimal network performance

Buy only the bandwidth you need now and add more when demand justifies it

One-stop-shop for ports and access services

Full port or burstable service with flexible committed bandwidth options

Quick turnaround when adding capacity

Fast provisioning as our global network is a single AS

“ I have never regretted signing on to the PCCW Global service. All my network backbone connectivity “hiccups” are gone. Now I have a VERY STABLE network and all my CLIENTS ARE HAPPY. There is GOOD INFORMATION FLOW about both scheduled and unscheduled network outages... ”

Frederick Opare-Ansah
(General Manager, Third Rail Ghana)
