

As business-critical applications and content move into the cloud, Enterprises need increased performance, predictability and security.

Software-Defined Interconnection®

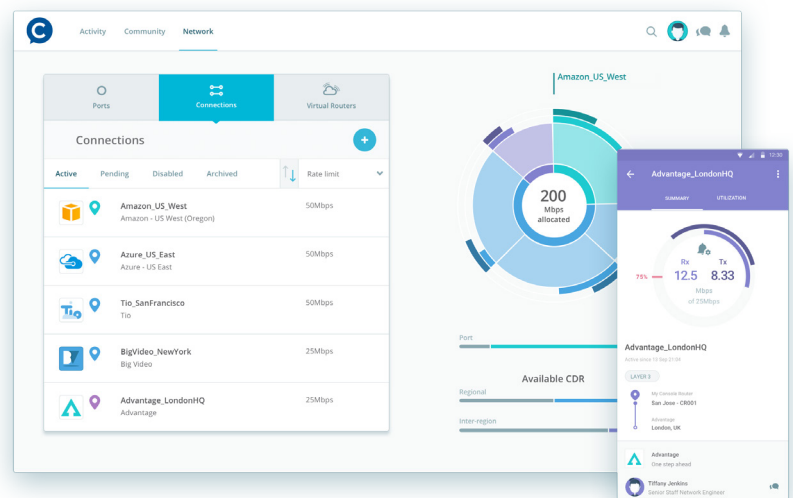

On-demand, private, predictable, instant, secure connectivity anywhere and any time.

Console Connect by PCCW Global is the world's first Software-Defined Interconnection® platform that makes connecting to cloud-based business critical applications and your business sites simple, predictable and secure.

Why is it different?

Console Connect by PCCW Global combines:

- PCCW Global's extensive Tier 1 global network
- Console Connect's software and powerful social network interface with layer 2 network automation software
- A unique ecosystem of XaaS providers (SaaS, IaaS, PaaS) – business critical applications and partners connected across the globe

Software-Defined Interconnection®

The Console Connect platform enables customers to privately interconnect with their own business community of XaaS solutions, enterprises, data centers and network service providers on-demand — all with a single click.

With Console Connect you can connect

- between your own sites
- to your business partners
- to cloud platforms and applications
- cloud to cloud

Console Connect delivers

- Improved performance
- Access and global reach
- Enhanced visibility and monitoring
- Reduced complexity
- Instant provisioning
- Time savings
- Reduced security threats
- Occasional use case

All your connectivity needs, delivered

Site-to-site connectivity

Connect enterprise data centers, headquarters to regional centers and branch offices

B2B connectivity

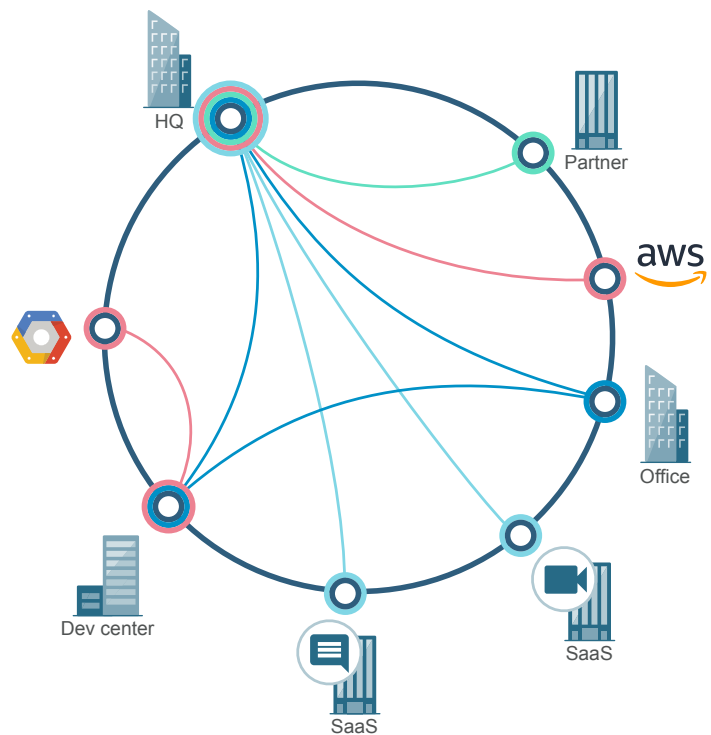

Leveraging social community to interconnect with business partners and supply chain

Private access to public cloud

Access to Amazon AWS, Microsoft Azure, Alibaba Cloud and other available IaaS Providers

Business critical SaaS applications

Securely connect to apps and services such as video conferencing, unified communications and service desks

Why choose Console Connect?

Self service

Intuitive simple user interface on web, smartphones that lets customers build and manage connectivity 24 x 7

Reduced complexity

Get started with just one port and one cross-connect

Agility and speed to market

Quickly and privately connect site to site, site to cloud, cloud to cloud. Access to cloud connectivity that can be provisioned in seconds and shaped on demand

Improved performance

Private, predictable and secure connectivity. Increase implementation efficiency and security measurement

Global reach

Leveraging PCCW Global's network and a global ecosystem of SaaS and cloud providers

Enhanced visibility and monitoring

Easily monitor connection performance. View bandwidth allocation and utilization. Dial bandwidth up and down as needed

API enabled

Can be integrated seamlessly into partners' existing platforms and infrastructures

Extended community

Access a community for network engineers - by network engineers - for knowledge sharing, troubleshooting and growing your business
